OHIO'S ENERGY FUTURE TOUR ANNOUNCES FIFTH STOP

Collaboration among businesses, trade associations, nonprofits and local governments will hold fifth forum in Cincinnati

Columbus, OH – Today, Ohio's Energy Future Tour announced that the fifth stop will be Cincinnati on Monday, June 1, 2015 from 5:30 -8:00 pm at Cincinnati State's Advanced Technology Learning Center Building Auditorium. The event is co-sponsored by Green Umbrella, Greater Cincinnati Energy Alliance and Cincinnati State.

"Hundreds of Ohioans from around the state have interacted with energy experts, community leaders, investors, businesses, health care professionals and non-profits to share their experiences and help shape our recommendations for the future of energy in this state," commented Jane Harf, Spokesperson for the Tour. "Now, the tour continues at our fifth stop in Cincinnati; we're excited to learn what this region thinks is key to Ohio's energy future."

The Cincinnati forum will provide an opportunity for panelists and audience members to offer their insights on the positive impacts renewable energy, energy efficiency and other clean, cost effective technologies are having in their local communities and the region.

The statewide tour is organized by a collaboration of businesses, trade associations, nonprofits and local governments and is intended to spark a dialogue with stakeholders in an effort to help develop a new energy vision for Ohio. A final forum is planned for Athens, later in June.

The forums are intended to help provide a path forward in developing an energy vision that returns Ohio to a position of national leadership. Upon completion of the tour, a collection of ideas and recommendations will be delivered to policymakers.

Those interested in attending the Cincinnati event should register online at:
